

UV Ring-Light set ϕ 66mm

Product No. OP-006 381

This fluorescence ring-light creates a flicker-free ultra violet illumination. Thanks to its high-frequency control and high quality bulb the ring-light ensures high intensity and very homogenous illumination of the objects. The UV bulb can be easily replaced by a white (daylight) bulb if required.

UV-radiation is in the range of UV-A (320 - 400 nm). Direct exposure to eyes shall therefore be avoided. UV protection glasses must be used when working with this illuminator.

Specification:

| UV Ring-Light | |
|----------------|---------------------------|
| Lamp | UV fluorescent lamp |
| Wave length | 365 nm Max. |
| Dimensions | 98 x 170 mm, height 37 mm |
| Inner Diameter | ϕ 66 mm |

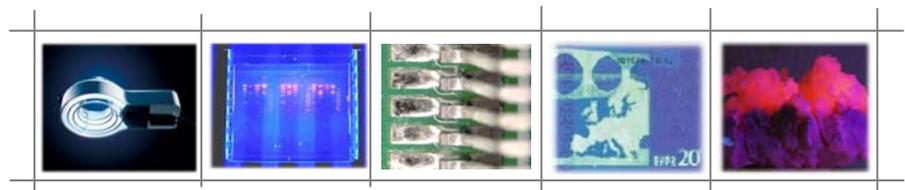

Including items when you order OP-006 381:

- Fluorescent UV Ring-Light ϕ 66mm mounting hole
- Control unit
- Power supply and Mains cable

Optional accessories:

- UV- Replacement lamp (spare part)
- White - Replacement lamp

The more you can see, the more you can fix!
