

# Tilt Table

Product No. OP-006 502

Optilia's newly designed ESD-protected Tilt Table facilitates easy examination of PCB cards and other objects. The Tilt Board provides the flexibility your examination needs and is designed mainly for use with Optilia's High Definition Inspection Camera Microscopes. The spherical solution provides movement in all directions and different angles.

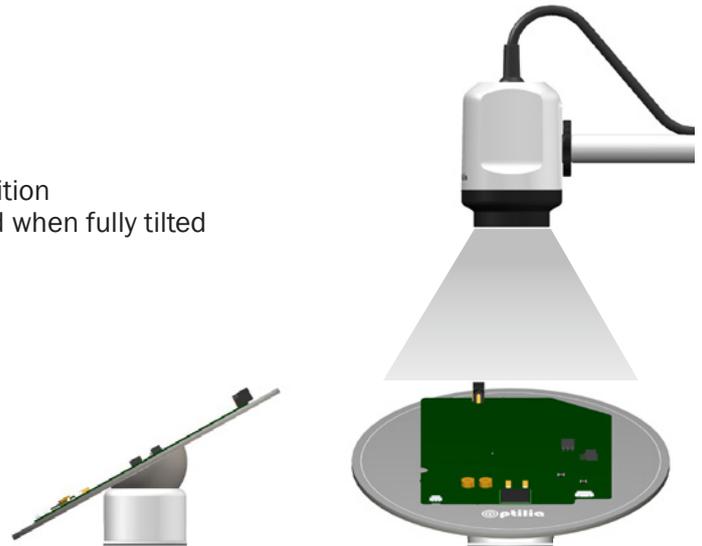

The Tilt Board is portable and remains stable during use due to the low centre of gravity. The board may be tilted up to 30 degrees in any direction and the high friction ESD-mat keeps your inspection object in place.

This Tilt Board can also be ordered with electromagnetically position locking system as option.

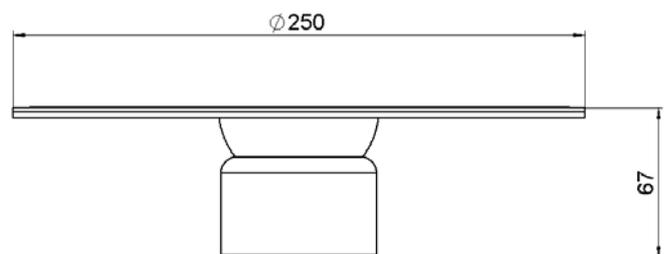

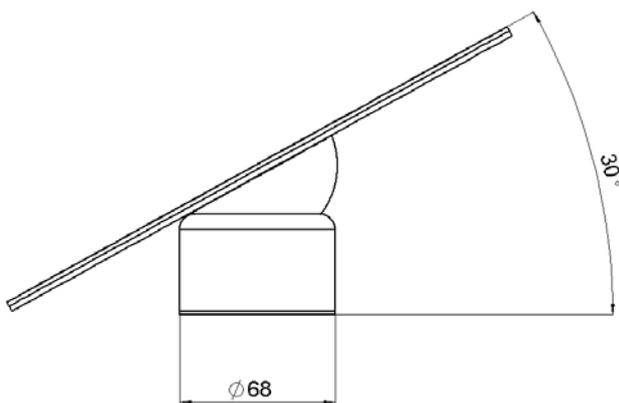

## Technical specification:

- Size of board ○ Ø250mm
- Maximum tilt angle ○ 30 degrees all directions
- Height ○ 67 mm at horizontal position
- Maximum height ○ 130mm from tip of board when fully tilted
- Weight ○ 1800 gr. max
- Surface material ○ ESD-protective mat
